discorded-ditzy10 said
Why did you need to run away from the past twilight?
Because it would affect her in the future and could potentially cause a paradox. I wasn't supposed to be involved in that.

doubledeadline said
So looks like your timeline is now inexorably tied to the Slaughter Cube Corner incident, yes? Also, didn't it seem that Pinkie knew somehow, that these events were predestined?
Dammit... I don't know, something's always been off about her, she felt wrong. Those headaches are from something that's just... Not dimensionally right.

Anght, preventing Rainbow's death from happening obviously isn't an option What about transp anting? Could you feasibly take a Rainbow and a (non-crazy) P nkie from one Jniverse and put them into Marshmallow's Jniverse?
I... Could technically put other versions there, but it wouldn't change events, and it wouldn't be the same. I'd be taking them from their universe and putting them in the wrong one, not to mention denying their own universes of having them.

tigro-spottystripes said

Put on a disguise if you need but you can't leave Pinkie like that, there must be something you can do to he p

I can't help with that situation. I just... I can't do anything. I'd need to find the point in time that changed events in the first place if I want anything to be fixed.

So once more the Tardis brings you where you need to go rather than where you want to go I believe you did acquire something in those unfortunate events, and that is Pinkie's scan If you can go back to when Pinkie was a filly and scan her then you can cross-reference them and create a timeline to find when the insanity set in
That is a possibility, yes. That event felt nailed in to place, but something was hammering it in before then...
If I find when the nail was first placed...

scifibrony said

Doctor don't feel bad about being there for these events If I remember, that bat pony, you met him what feels like forever ago and he seemed to remember you referencing the "Slaughtercube Corner incident" Which means, that conversation alone means you were destined to be here for these events

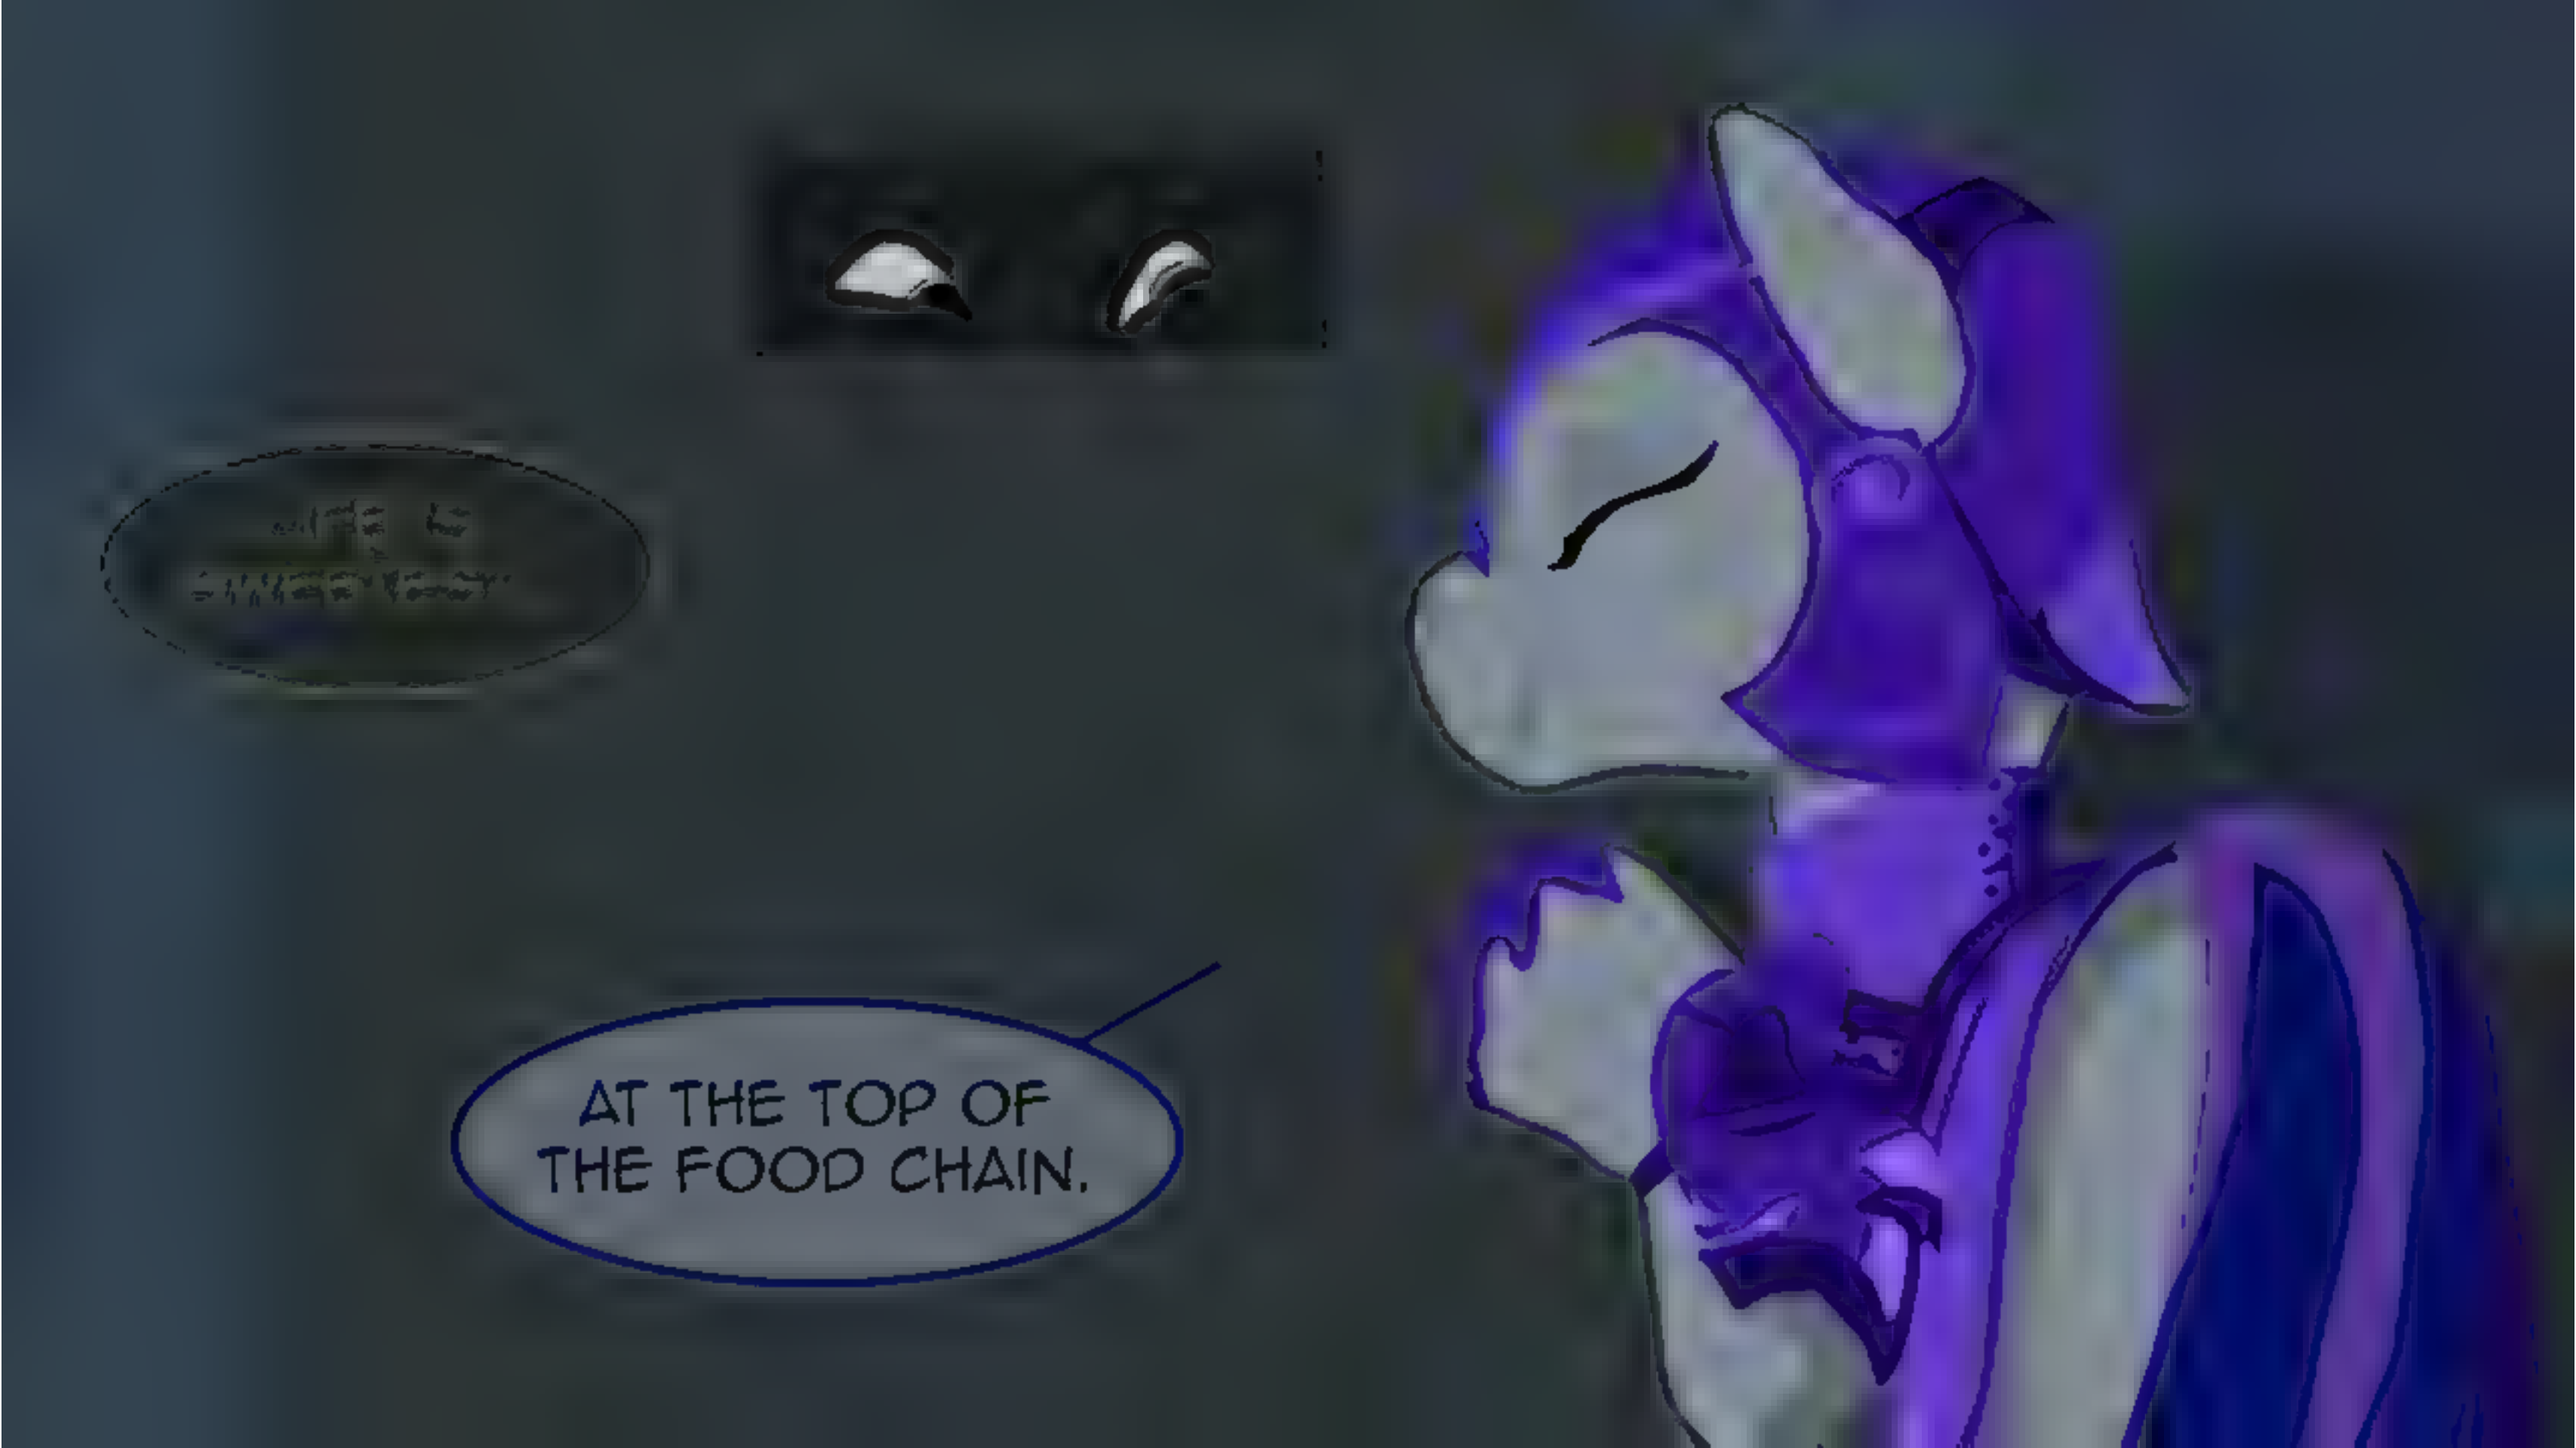
IS THIS A DATE?

IT'S LUNCH.
IF IT TURNS INTO A DATE DEPENDS ON YOUR BEHAVIOR.

IS THIS THE RIGHT PLACE?

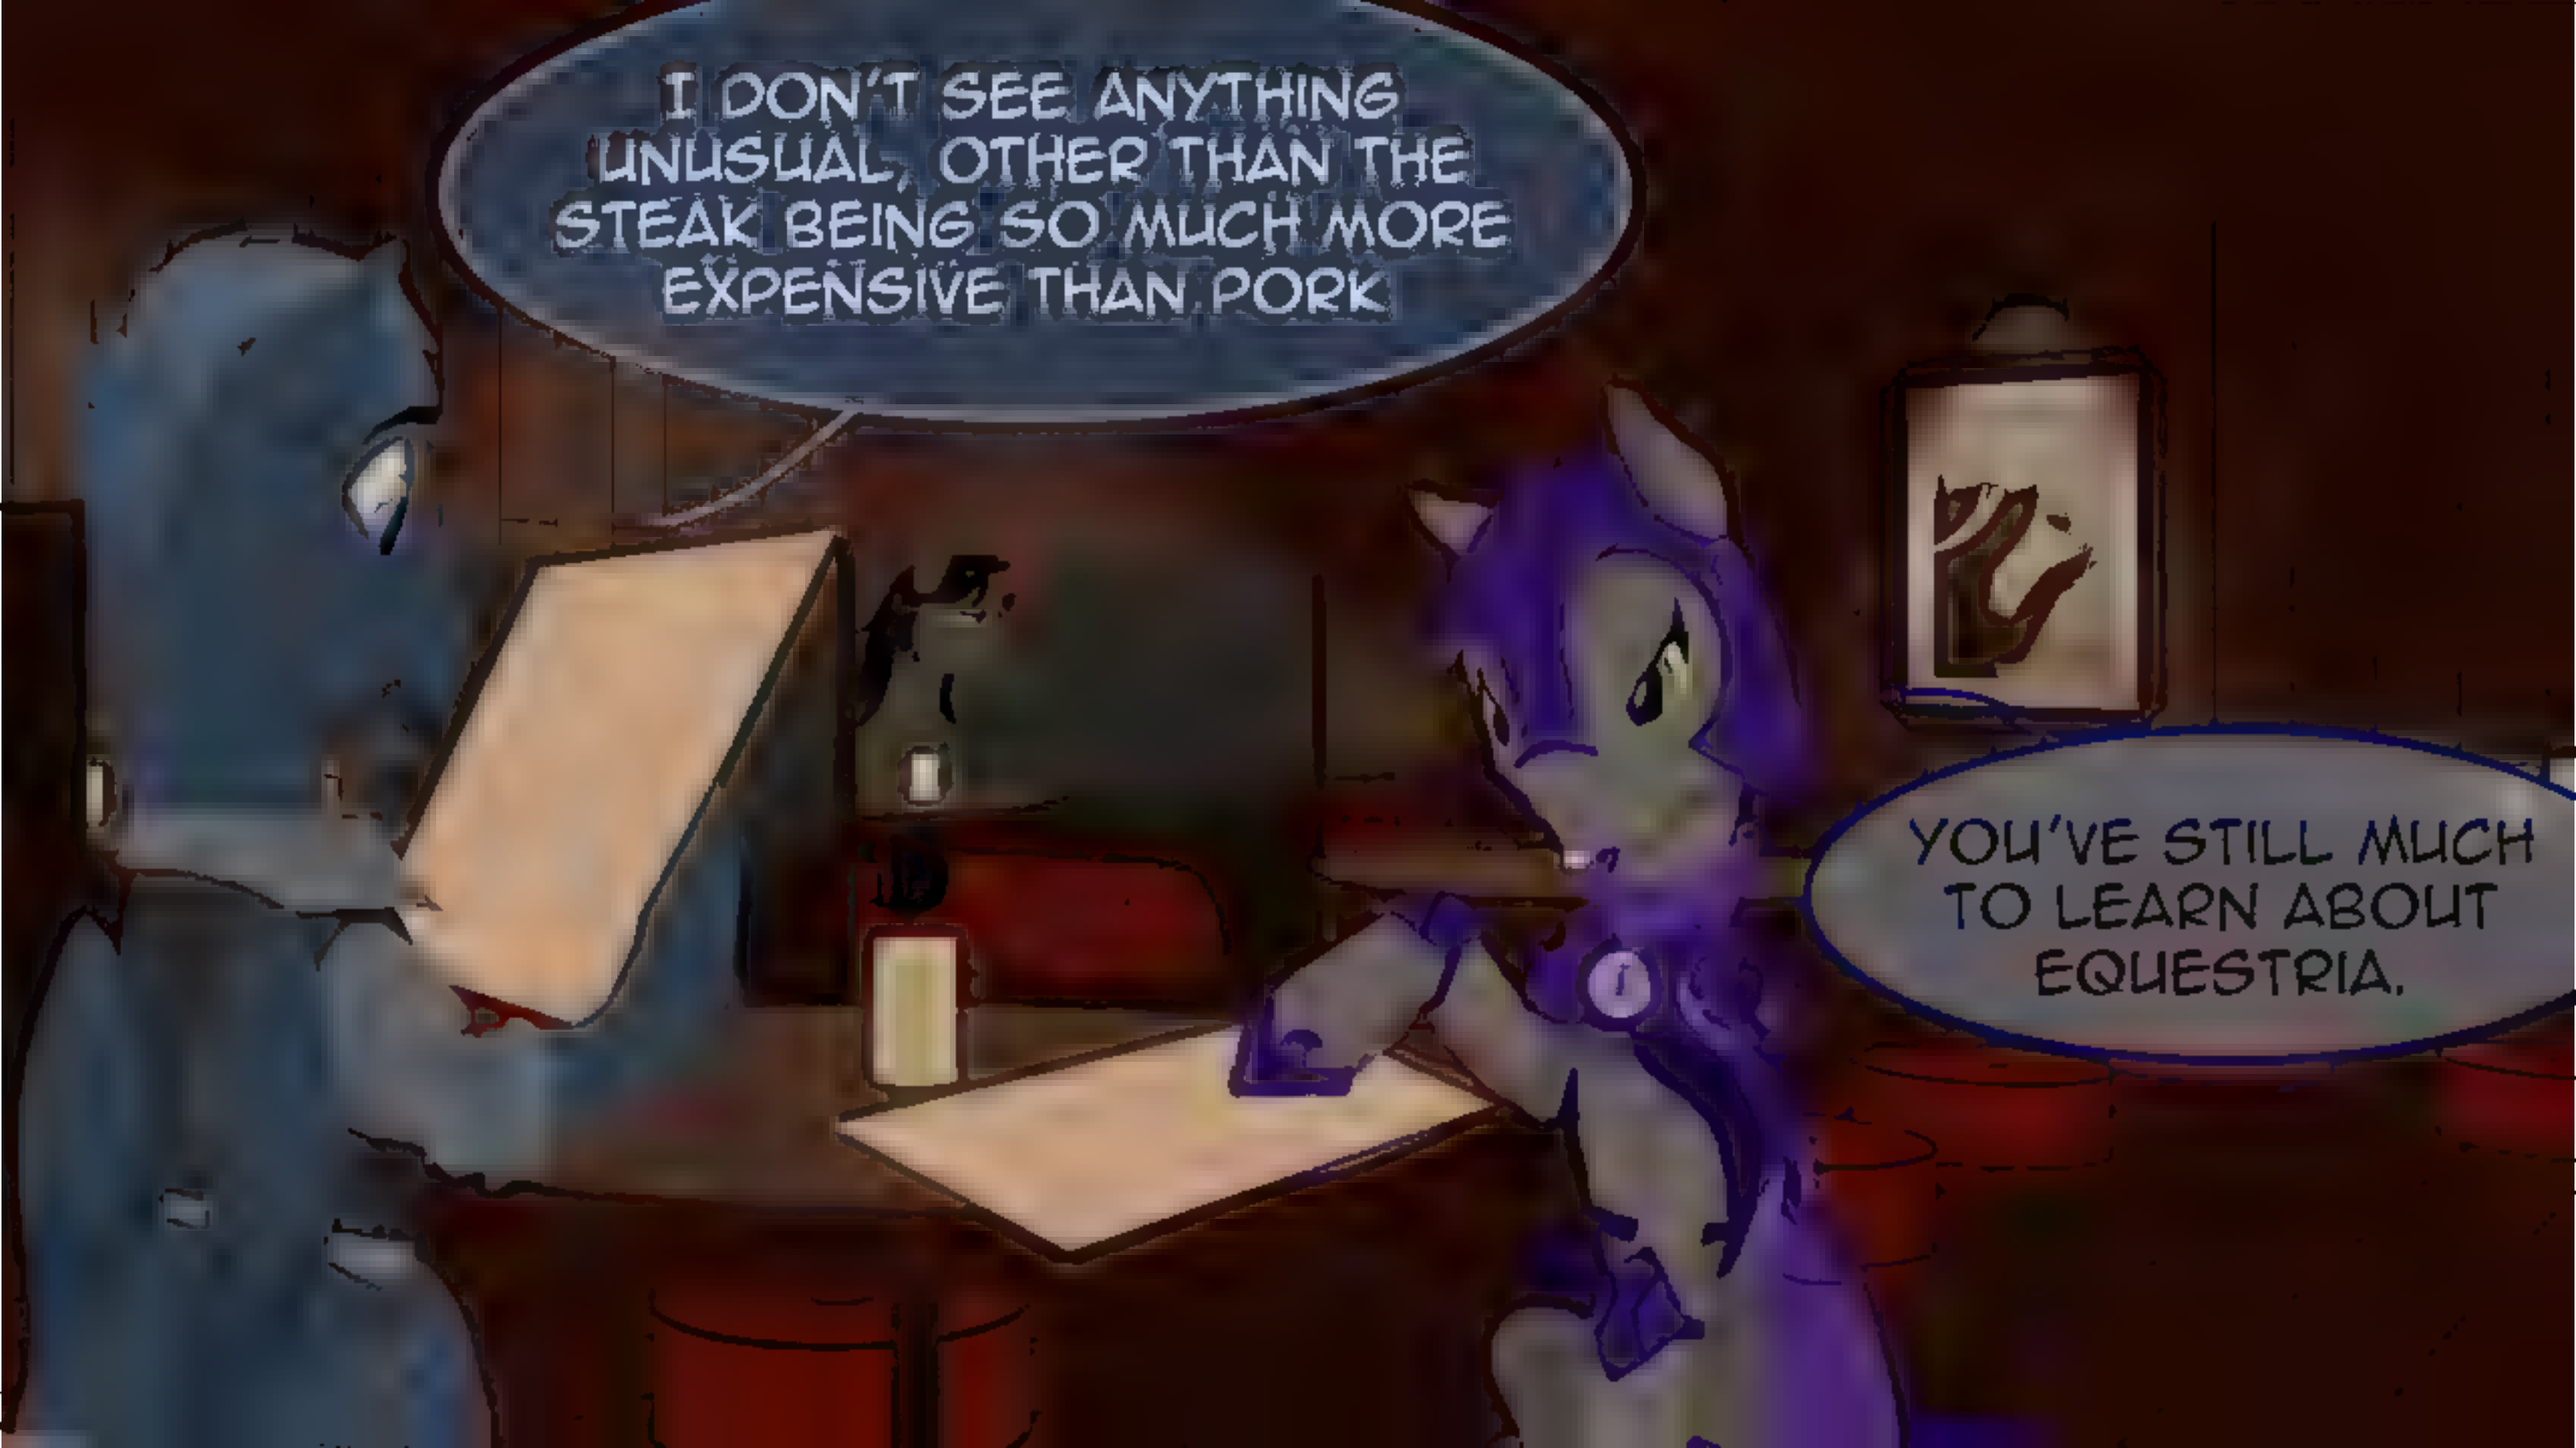
I SEE YOU MADE IT.
I WAS WORRIED I WAS AT THE WRONG PLACE.
WHERE'S THE RESTAURANT?



AT THE TOP OF
THE FOOD CHAIN.

SOME RESTAURANTS IN EQUESTRIA ARE HIGHLY SELECTIVE OF THEIR CLIENTELE.

NEAT PLACE, BUT WHY ALL THE SECRECY?
YOU'LL UNDERSTAND WHEN YOU SEE THE MENU.



I DON'T SEE ANYTHING UNUSUAL, OTHER THAN THE STEAK BEING SO MUCH MORE EXPENSIVE THAN PORK
YOU'VE STILL MUCH TO LEARN ABOUT EQUESTRIA.

I'LL HAVE A PORK BURGER WITH A SIDE OF FRIES.
BACON SANDWICH, EXTRA SAUCE.

NOW THIS IS A FAMILIAR MEAL
DAFFODIL SANDWICHES ARE STILL A BIT ODD TO ME
THEN YOU CAN UNDERSTAND WHY THIS MEAL WOULD BE CONSIDERED 'ODD' TO REGULAR PONIES.

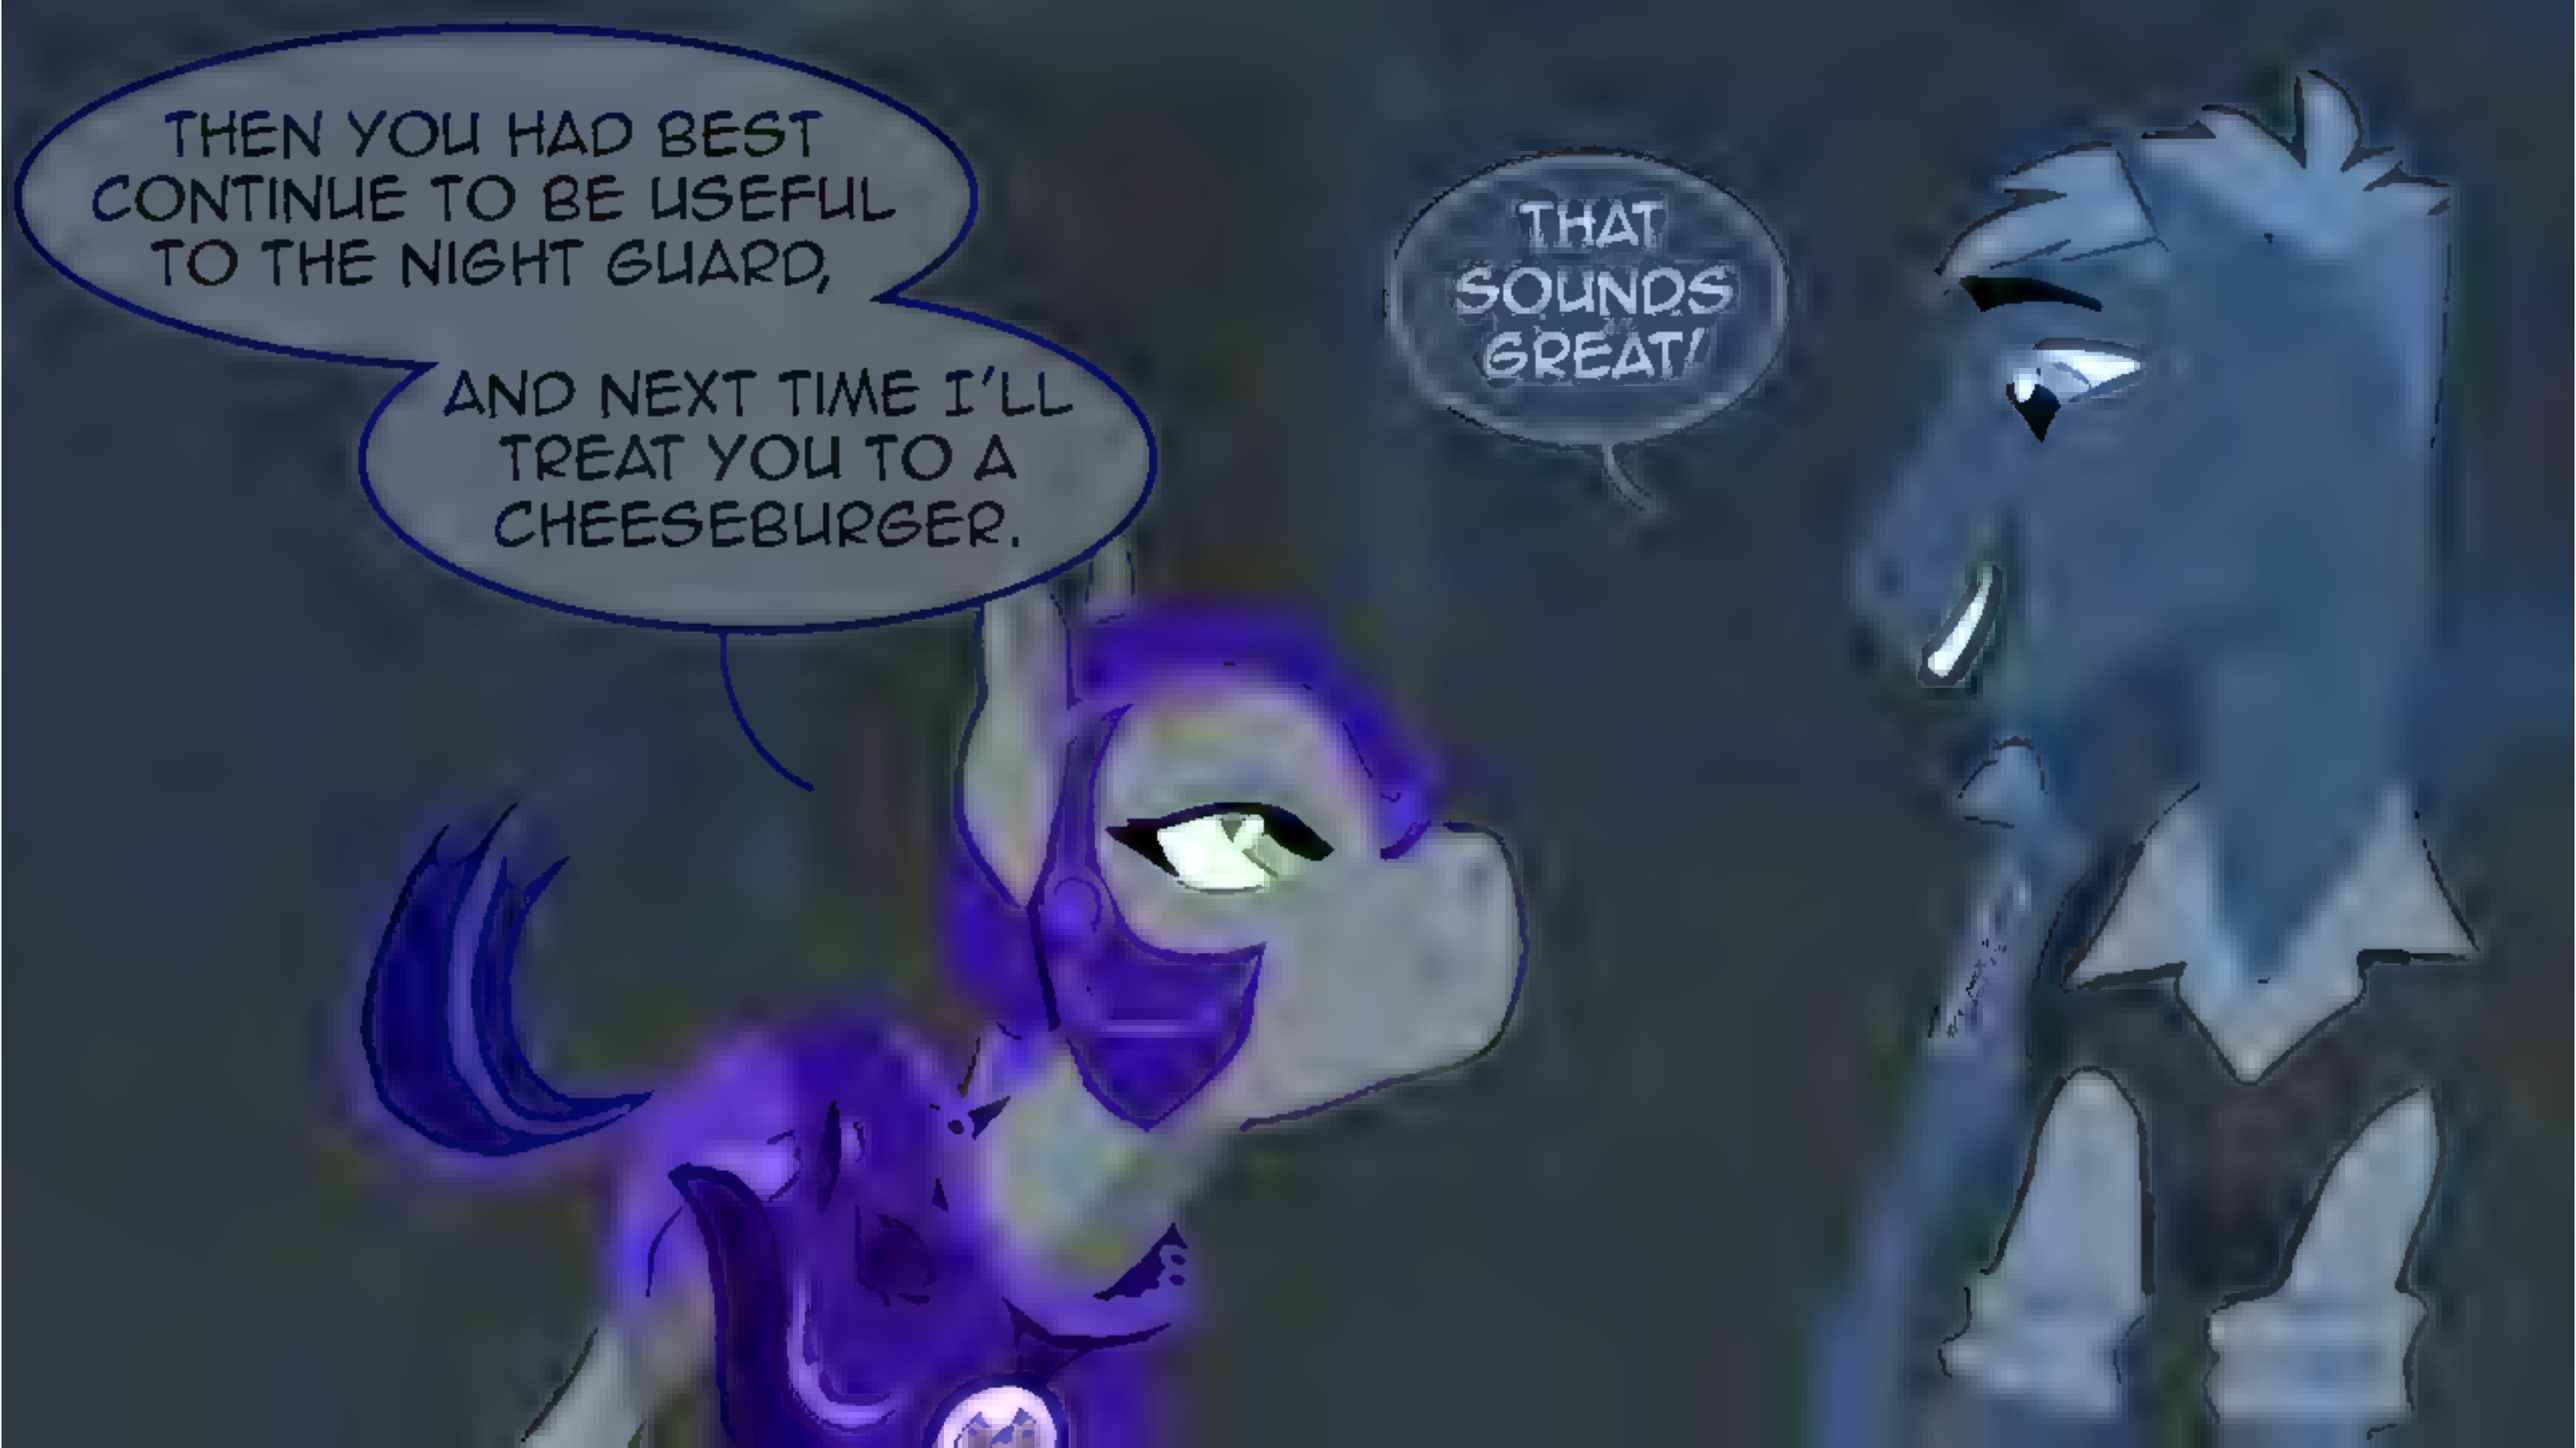
SO EATING MEAT IS LEGAL BUT UNCOMMON?
IT'S MOSTLY A SOCIAL TABOO.
IT SIMPLY ISN'T TALKED ABOUT IN PUBLIC.

SO WHY IS STEAK EXPONENTIALLY MORE EXPENSIVE THAN PORK?
PIG'S DON'T TALK.
OBTAINING STEAK, LEGALLY, IS VERY DIFFICULT.

SO MEAT EATING IN EQUESTRIA IS BASICALLY...
OUT OF SIGHT, OUT OF MIND?
AND THUS THE SECRECY OF THE RESTAURANT.

HMM, I'M CONFLICTED ABOUT THIS.
ON ONE HAND, ER...
HOOF.
I SEE THE MORAL IMPLICATIONS.
ON THE OTHER, I COULD REALLY GO FOR A CHEESEBURGER
I THINK YOU'LL FIT IN AROUND HERE JUST FINE.

I TRUST THAT WAS A SUFFICIENT 'REWARD' FOR YOUR SERVICE?
THAT WAS A RATHER NOSTALGIC MEAL, I'LL HAVE TO COME BACK SOMETIME.



THEN YOU HAD BEST CONTINUE TO BE USEFUL TO THE NIGHT GUARD,
AND NEXT TIME I'LL TREAT YOU TO A CHEESEBURGER.
THAT SOUNDS GREAT!

AND NEXT TIME,
I JUST MIGHT CONSIDER IT A DATE.

applenotes-whooves said

Dearest Doctor, I see there has been a lot of Octavia around, maybe you should investigate a bit and see why is she nearly always around bes des she seemed to be looking for you Something just doesn't seem right with that don't you think?
said
So why DO you keep running into this mare? mean you two seem to meet a fairly large number of times more than a dimension-hopping time-traveler could expect to meet just one person anyways how many of these are coincidences? s there some greater purpose do you think?)
"It might be my fault. I kept pursuing her after we'd first met and even tried to provoke her to seek me out...
Or maybe it had to do with her being with the Master...?"

Although irritating Octavia is rather smart Perhaps she could be useful to you? perhaps you should keep her around a bit longer your closet would prove effective in doing so
You could be nice to Octavia and try and get to know her She may soften up and become a valuable ally if you two become friendly!
'I'm not doing this to make friends. I'm doing this to figure out who she is and what she wants.'
So where are you from anyway? That's not a Canterlot accent.

My family and I came from Orlavia, hoping to become famed in Equestria.
And vat about you, Space Scountrel...?

Ha, me?
You wouldn't
know anything
about it.

You see, I come from a dimension where ponies are just farm animals mostly used for labor and to carry small children around for their entertainment. The intelligent species in charge meanwhile eat meat on a day to day basis, from chickens to pigs to cows, they love stuffing flesh down their gobs...!

It's a fashion trend, mostly. It used to be for medical reasons, or enhancing ponies to survive better. But the ponies with more money than branches on their family tree turned it in to this.

Okay I get that but I saw those fake horns working magic, how is that possible?
To explain it to a five year old. The horns and wings are a blend of Magic and Technology, or Magitek, and to explain how it works would involve more time than I'm willing to invest.

Are you serious? Did you flunk history or something?
Let's just say I was sheltered.

ask-jolly-roger
So th s is the Vannice of the future There s probab y something fishy go ng on The ast t me you went to Ven ce in the human universe you stumbled upon vampire fish. But is there anyth ng in the recorded h story of this city that warrants the TARDIS to bring you to this t me and p ace?
Look just break it down to the most major events that made this city what it is.
Over a thousand years ago Discord returned and crucified the Princesses Celestia and Luna in front of their subjects.

Princess Twilight and Princess Cadence held the line for as long as they could before they too fell.

After they died, 90% of the pony population was slaughtered for Discord's amusement. The last 10% ran and hid from Discord and found a stash of old notes hidden in a huge library hidden near the Plaguelands, and thanks to a pony named Tesseract Comet, we managed to recover and rebuild with the arts of Technowizardry he created.

We're still at war with Discord, but we're gaining ground every day.
Recently, some of the "Pure Families" of the Painted Ones decided they wanted to try to breed a new unicorn into the world, and all they managed to do is reduce their family trees to the trunks and a few twigs here and there.

After that failed, they decided to enhance themselves with the taboo arts that Tessera Comet said were possible but would come at the cost of a pony's morality. So they artificially gave themselves horns and wings. Then that became common among the rich. So now, in order to show status, it's about how to make yourself fashionable without going too far

Now there's talk of a new type of alicorn they're trying to create, but we don't know much other than the name. The Eden Project.
Ponies on the outer walls and tourists have been disappearing ever since

Usually I only draw up schematics for customers so this is the best I have. The lab is built in units, civilian level ArsTek Prosthetics is about as far as anypony who doesn't work there can get. Beyond that is the military grade research, and past that is so secretive nopony outside knows what's there. I believe that's where we need to go to find the plans for the Eden Project, and once we get hold of those plans and prove what's going on, we can gather forces against the lab.

Hiya Neo! Maybe you can help out by analyzing some data? Tg ya got some data or schematics for us?
I've mapped out 80% of the lab, but the rest has no accessible data. I'd need to be connected directly to the lab for that information.

So now we need a plan to get back through the city undetected to get a reading for the TARDIS and then get to the lab, where we'll connect Neo.
If I had a way to monitor the area, I could guide you through.

skullcroos said
Can't you place that AI in that golden drone thingie? and use him as a scout? you will turn him in a cute golden flying pet. so win win
Not a bad idea, except they're magically controlled, Neo and the Sonic don't do magic.
You scanned one earlier, remember? I've already made the blueprints to build my own version~ We just need the parts and someone to build it!

I was meant for this...

weeniegenie69 said

It's pretty limited, anything stronger than soldering has a ricochet. But it gets the job done.

If Eden has your Tardis you might not ever get it back. Even if you do, well considering what they've done to themselves it probably wont be quite the same
Sure enough it's in the lab, looks like we'll be going in.

I can keep an eye on things but that won't be enough to get through.
So we need some kind of disguise or distraction...

A portable high-level Perception Filter can be built using a TARDIS Key and parts from a laptop and a cell phone. However it won't work on all Time Lords
lost-y said
doctor could you create a perception filter using the key of the tardis again? one mistake would be if they have a video recorder and a screen (imagine they are lenses with it) or that it will only work once that if they perceive it, it will not work unless their memory is erased. There is also the failure that this would not work through a non-sapient device
A perception filter could work part of the way but I'm not sure if it's good enough.

That's where I come in!
I can make it
more effective!
It's just a couple

I haven't done personalized projects like this in so long...!

You know Doctor there's something kind of ironic about this situation. You tried to avoid the whole adventure thing, yet here you are. Caught up in espionage. Like a wise man once said, "People often meet their fate on their path to avoiding it."
